APEX ROOF

DESIGN A

DESIGN B

***Example images of 8' x 6'**

**Design A/B showing
two extra windows**

1. Free local delivery & erection.
2. This building is available in these three claddings.
3. Our basic price includes one 2'6" door & one 2'x2' fixed window.
4. Frame size 38mm x 50mm prepared with four corners rounded.
5. Rounded roof edges on eaves.
6. Polyester Roofing Felt.

7. Extra fixed & opening windows can be added. (See page 8 in the Price List).
8. Extra single & double doors can be added. (See page 8 in the Price List).
9. All buildings come with a timber floor, a suitable base is required. (See Base Preparation page 16 in brochure).
10. All timber products must be treated by the customer after delivery to waterproof the timber.

We recommend Elfords Top Coat Timber Treatment (solvent based). (See page 15 in this brochure for colours).

Heavy duty hot spelter galvanised fittings used on both shiplap cladding.

Rounded roof edges give a softer look and makes the roofing felt last longer.

Door frame on both shiplap claddings have been doubled up to give extra strength.

Apex Roof

FREE LOCAL DELIVERY & ERECTION. ALL PRICES PLUS V.A.T

***7' Wide Summerhouses have one Single Door**

Bespoke sizes can be ordered on request.

Add 6" for external height

ALDWICK SUMMER HOUSE

Side windows are an optional extra.

1. Free local delivery & erection.
2. This building is available in three types of claddings.
3. The front panel is the larger size.
4. Our basic price includes double doors & two CG6 fixed windows with toughened glass fitted as standard.
*(7ft wide summerhouses have a single door).
5. Frame size 38mm x 50mm prepared with four corners rounded.
6. Rounded roof edges on eaves.
7. Polyester Roofing Felt.
8. Extra fixed & opening windows can be added. (See page 8 in the Price List).

9. Wider doors can be added to sizes 10ft and over. (See page 8 in the Price List).
10. All buildings come with a timber floor, a suitable base is required. (See Base Preparation page 16 in this brochure).
11. All timber products must be treated by the customer after delivery to waterproof the timber.

We recommend Elfords Top Coat Timber Treatment (solvent based).

(See page 15 in this brochure for colours).

Rounded roof edges give a softer look and makes the roofing felt last longer.

FREE LOCAL DELIVERY & ERECTION. ALL PRICES PLUS V.A.T

Bespoke sizes can be ordered on request.

Add 7" for external height

WORK BENCHES & SHELF

- Shelves & Work Benches can be fitted into most of our buildings. These are fitted at a height to suit you on the day we erect your building for you.

(For price, See page 7 in the Price List).

ELFORDS TOP COAT TIMBER TREATMENT

5Ltrs

(For prices, see page 7 in the Price List).

- Elfords top coat timber treatment has been formulated to provide our buildings with colour and weather protection all-in-one.
- A choice of four colours is available in 5Ltrs tubs.
- This product should be applied as soon as possible after the building has been erected & refreshed on a yearly basis.
- If you have asked us to factory pre-treat your new building, you will still need to apply this product to waterproof the timber.

Caution, before use, please read instructions on the tub. This is a solvent-based treatment.

DISMANTLE & DISPOSAL OF OLD SHEDS

Terms & Conditions:

- We would recommend a site visit to see the existing shed & if possible, the base before ordering.
- The shed has to be emptied before we arrive to remove it.
- We will only take the floor, roof & side walls. Not the contents.
- Electrics have to be removed & made safe before we arrive to dismantle the shed.
- If the shed has been lined/insulated, this has to be removed by yourself prior to us dismantling your shed.
- We cannot remove or work on any shed with any type of asbestos in its construction.
- Your old shed is more than likely to be on a base of some kind. At the time of a site visit, we may not be able to see if this base is suitable for the new shed because the existing shed is sitting on it.

At the point of dismantling your old shed, we may discover that the base is not suitable, a new base or additional bearers may be required (we can supply bearers for you).

The cost of additional bearers or a new base is not included in the dismantling price (we have someone who can do a base for you). If we cannot erect the new shed because the base is not suitable, we will leave the building on site until you contact us to say the base is ready. You will need to pay the driver the full balance at the point of delivery as we are not able to leave products on site without being paid in full (there will be no extra charge to come back & erect the shed). If the shed has to be brought back to our premises, we will charge for handling & storage of your building.

(For prices, see page 7 in the Price List).

We are a registered Waste Carrier. Registration Number CBDL30003. All waste is taken to a recycling plant & not landfill.

BASE PREPARATION

Your new building will require a suitable base for it to sit on, concrete or paving slabs would be suitable. Both of these options should be put down to the same dimensions of the floor of the ordered building (please ask for sizes). They must both be flat and level, not too close to any walls or fences as all buildings have roof overhangs. A 15" gap all around would be ideal. Please do not put a fall of any kind when laying your base as this will cause the building to lean. If you have an existing base or patio area which is bigger than your new building, we would recommend Treated Bearers or Composite Floor Joists to be used. Both options will help protect the floor from rotting. We can supply both of these for you. All of our timber floors have joists nailed to the underside, these are approx. 12" apart for extra strength.

- **3" x 3" Bearers** – These are generally needed when the base the building is going onto is bigger than the building. These bearers will help protect the floor from rotting. The floor will be raised an extra 3" off of the base.
- **Composite Floor Joists** – These are used instead of the standard wooden floor joists. They are a more permanent option as they do not rot and work well with oversized bases and patio areas. This will keep the step into the shed lower than using 3" x 3" Bearers.

(For prices, see page 7 in the Price List).

Concrete Base 4" thick

Paving Slabs on sand and cement dry mix

Floor with 3" x 3" bearers

Conditions of Sale – Garden Buildings

Payment

10% deposit with order, final payment on completion to driver/erector. Please note that we are unable to leave any building on site without the final balance being paid to the driver. All products remain the property of Elford's Sheds (Chichester) Ltd until paid for in full.

Payment Method

You can pay by Cheque, Card, Cash or Bank Transfer. If you choose Bank Transfer as a payment method, this will have to be completed 3 working days before delivery of your building. Please use your order number as a reference & send to Sort Code 40-17-16 Account Number 52063778. Please advise us of your payment so we can check it has arrived.

Specification

The sizes of various products in our brochure are approximate and no not include roof overhangs. All timber sizes are nominal (i.e. size before they are machined). We reserve the right to make changes to published specifications & prices as they may from time to time be dictated by available material or our policy to seek improvements.

Delivery

We will be pleased to give our customers an indication as to delivery time scales, but this information although given in good faith, is only given as a guide. At no time can we guarantee delivery on a certain date or specific time. Delays should be expected during busy Spring & Summer months. The person(s) placing the order should be present at the time of delivery to ensure the building is assembled in the correct position. It is the responsibility of the customer to ensure that we have clear access to the site. We offer a Free Local Delivery & Erection service on our first visit. If we are unable to complete the job on the first visit for any reason that is not the fault of Elford's Sheds (Chichester) Ltd, a charge will be made to return & finish the job.

Bases

It is the customers responsibility to provide a flat & level base for the building to sit onto (please read base text on page 16 in this brochure).

Guarantee

We offer a 12 month guarantee with all products on the condition that the exterior is coated with Elford's top coat timber treatment as soon as possible after delivery and that the base on which the building stands on is flat & level. The guarantee does not include damage caused by adverse weather conditions or acts of vandalism. Call out and repair charges will be made to all jobs after the guarantee has expired.

Self-Assembly

Customers who choose to self-erect their building take full responsibility for any defects caused through erecting.

Natural Timber Products

Timber is a natural living product which contains natural defects such as timber shake (surface splitting), dead knot which can lead to the knot falling out, warping, twisting and shrinkage. When the air temperature is high, these faults are even more prevalent with timber. So, to help reduce these faults, both our TGV & Shiplap boards have extended joints between them. We also recommend the use of Elford's top coat timber treatment be applied to the exterior surface as soon as possible & regularly treated there after (please read treatment text on page 15 in this brochure). This solvent treatment soaks into the timber, working well as a water repellent, as well as keeping the timber supple. During the manufacturing process of your building, we will endeavour to select timber with minimum defects, but you should still expect to see some on your building.

Roofing Felt

Polyester felt is used on all our buildings because it is much stronger and lays flatter than standard felt. You should initially expect to see wrinkles & bubbles, but these will settle down with time. The life expectancy of felt will vary and be determined by weather & the building location.

Planning

It will be the responsibility of the customer to check with their local planning authority regarding planning permission for the building.
